PERSONAL PROJECT

SRM Institute of Science and Technology

Car Parking System:

Created a service based online website for online booking car parking space for those who wants to book their space in advance. Built a responsive website using Html, Php, CSS and MySQL. Basically this project was made for the convenience of people so that slots can be easily booked in both online and offline mode. With this facility the end user is provided with a wide range of user friendly parking facilities in all major organization of various cities.

OBJECTIVE

Motivated and talented fresher with a Master's degree in Computer Applications, seeking a challenging and rewarding position in the field of software development. Eager to apply my technical skills, passion for coding, and ability to quickly learn new technologies to contribute to the success of a organization. Committed to delivering high-quality software solutions while continuously enhancing my professional skills and knowledge.
